

BABA

WINE LIST

The producers in the 'Baby' wine list are not and will never be random. Behind each of them, in addition to a great wine, there is also a story or tale of a unique tradition worth telling. I manage to get to know many of them personally, to talk to them, to understand even more about their approach to winemaking and their style.

For the most part, we will be working with low-intervention wines and bottles from small, boutique but also charismatic producers. These are wines that are not made according to strict templates. Wines that are alive, real, authentic. I also look towards the classics with great respect and reverence, so there will also be bottles from more conventional producers and great icons of the wine world.
